### INTERNATIONAL PROGRAMS FOUNDED

I am the **founder and president** of the [Computing Connections Fellowship](#), which provides institution-independent transitional funding and research visits for computer science Ph.D. students seeking healthier environments. Our two year pilot is in programming languages.

I am also the **founder and previous chair** of [SIGPLAN-M](#), a cross-institutional long-term mentoring program for the programming languages research community. It currently reaches more than **200 mentors** and **300 mentees** across more than **44 countries**, and has been described by mentees as “**life changing**” and “**a career saver.**”

My work founding these two programs (along with my other service work) led me to receive the **2023 ACM SIGPLAN [Distinguished Service Award](#)**.

## RESEARCH IMPACT

My work introduced [proof repair](#), which has since been implemented and adapted at [Amazon](#) and [NASA](#), and is the subject of a [DARPA AI Exploration](#), a grant for which I am primary PI.

## RESEARCH VISION

How can we build a world in which programmers of **all skill levels** across **all domains** can prove the absence of costly or dangerous bugs in software systems---that is, **formally verify** them? I lead a group that builds **proof engineering** technologies to make that world a reality. My group loves to use the whole toolbox---everything from **dependent type theory** to **program transformations** to **neural proof synthesis**---all in service of **real humans**.

## JUST FOR FUN

I love **judo**. I am just a yellow belt, but I am hooked. My favorite throw is **ippon seoi nage**. My [home dojo](#) (**Kokushi Midwest Judo**) is fantastic. I find judo really amazing for clearing my mind, staying fit, and making friends. I like to visit other dojos all over the world when I travel for work. You should try judo, too!

Before that, I used to compete for **Club Northwest**, a top **distance running** club in Seattle. I served on the board of Club Northwest from 2015 to 2016. I ran **NCAA Division I Cross-Country** in 2009. And before even that, I was a **competitive swimmer** for ten years,

I also enjoy **solving logic and number puzzles**, **writing poetry**, **singing**, **studying languages**, **making bagels**, **making chocolate truffles**, **windsurfing**, **playing Dance Dance Revolution**, **foraging edible mushrooms**, and **composing music for the piano**.
