INTERNATIONAL PROGRAMS FOUNDED

I am the **founder and president** of the [Computing Connections Fellowship](#), which provides institution-independent transitional funding and research visits for computer science Ph.D. students seeking healthier environments. Our two year pilot is in programming languages.

I am also the **founder and previous chair** of [SIGPLAN-M](#), a cross-institutional long-term mentoring program for the programming languages research community. It currently reaches more than **200 mentors** and **300 mentees** across more than **44 countries**, and has been described by mentees as “**life changing**” and “**a career saver.**”

My work founding these two programs (along with my other service work) led me to receive the **2023 ACM SIGPLAN [Distinguished Service Award](#)**.

RESEARCH IMPACT

My work introduced [proof repair](#), which has since been implemented and adapted at [Amazon](#) and [NASA](#), and was the subject of a [DARPA AI Exploration](#).

RESEARCH VISION

How can we build a world in which programmers of **all skill levels** across **all domains** can prove the absence of costly or dangerous bugs in software systems – that is, **formally verify** them? I lead a group that builds **proof engineering** technologies to make that world a reality. My group loves to use the whole toolbox – everything from **dependent type theory** to **program transformations** to **neural proof synthesis** – all in service of **real humans**.

JUST FOR FUN

I have a **beautiful baby daughter** named Sarah Rose El-Kebir. I love her more than I could have ever imagined, and she takes up most of my time outside of work these days. I am happy to send baby photos by request!

Before Sarah, I used to spend a lot of time playing **judo**. I was fairly new to it, but hooked.

Before that, I used to compete for **Club Northwest**, a top **distance running** club in Seattle. I served on the board of Club Northwest from 2015 to 2016. I ran **NCAA Division I Cross-Country** in 2009. And before even that, I was a **competitive swimmer** for ten years.

I also enjoy **solving logic and number puzzles**, **writing poetry**, **singing**, **studying languages**, **making bagels**, **making chocolate truffles**, **windsurfing**, **playing Dance Dance Revolution**, **foraging edible mushrooms**, and **composing music for the piano**.
